

Table of Contents

Introduction	2
Standards and Outcomes	6
Learner Objectives	6
Procedures	
Amsler Grid Testing	7
Autorefracton	9
Axial Length Measurement: A-scan Ultrasonography	11
Axial Length Measurement: Partial Coherence Interferometry (IOL Master)	13
Biopsy: Eyelid or Conjunctiva	16
Botulinum: Injection of	18
Brightness Acuity Test (Glare Test)	20
Chalazion Incision and Drainage	22
Chelation with EDTA	24
Color Vision Testing Using Ishihara Plates	27
Confocal Scanning Laser Ophthalmoscopy with Heidelberg Retinal Tomograph	28
Contact Lenses: Removal by Other Than Wearer	30
Contact Lenses/Soft: Insertion, Removal, and Care by Wearer	32
Contact Lenses/Standard Hard and Rigid Gas-Permeable (RGP): Insertion, Removal, and Care by Wearer	35
Corneal Scraping	37
Corneal Sensation	39
Corneal Staining with Fluorescein, Rose Bengal and Lissamine Green	41
Corneal Topography	43
DCR Testing for Nasolacrimal Patency	44
Disinfection of Ophthalmic Equipment and Environmental Surfaces	47
Endothelial Cell Count	51
Epilation: Electrolysis or Cryodestruction	52
Epilation: Manual with Forceps	54
Exophthalmometry	55
External Examination of the Eye	56
Extraocular Muscle Evaluation and Screening	59
Eye Culture: Conjunctival	61
Eye Drops and Ointments: Instillation of	62
Eye Irrigation for Chemicals	64
Eye Irrigation: Cleansing	66
Eye Patch: Light	67
Eye Patch: Pressure	68
Eye Prosthesis and Conformer: Insertion, Removal, and Care	70
Eye Shield	73
Eyelid Compresses: Cold	74
Eyelid Compresses: Warm	75
Eyelid Eversion	76
Eyelid Hygiene for Blepharitis	77
Eyelid Suture Line Care	79
Facial Resurfacing with Chemical Peel	80
Facial Resurfacing with CO ₂ Fractional Laser	82
Facilitating Environmental Control for Persons with Visual Impairment	85
Fluorescein: Injection of	87
History Taking for the Ophthalmic Patient	89
Hypoglycemia: Guidelines for Treatment in the Ophthalmology Clinic and Office	91
Indocyanine Green: Injection of	94

Intravitreal Injection.....	96
Intravitreal Tap and Injection of Antibiotics	98
Keratotomy: Superficial – Mechanical	100
Keratometry.....	101
Laser: Patient Preparation and Safety Measures	103
Lensometry: Automated	106
Lensometry: Manual.....	108
Low Vision Aids.....	110
Moisture Chamber.....	112
Needling of a Filtering Bleb	113
Oculoplastic Procedures	115
Optical Coherence Tomography (OCT).....	118
Pachymetry: Ultrasonic	120
Pediatric Ophthalmic Examination	122
Photodynamic Therapy (PDT).....	125
Pneumatic Retinopexy	128
Potential Acuity Measurement: Potential Acuity Meter (PAM) and Laser Interferometer	131
Presurgical Periocular Scrub	133
Prostigmin and Atropine Injection.....	135
Pterygium Excision With or Without Conjunctival Graft.....	137
Punctal Occlusion Using Hyfrecator or Cautery	139
Punctal Occlusion: Insertion of Punctum Plugs	140
Punctum Plug Removal	141
Pupil Examination	142
Scanning Laser Polarimetry: GDx.....	144
Schirmer Tear Test.....	145
Slit-Lamp Examination: Basic and Intermediate	147
Subconjunctival and Subtenon Injections.....	153
Tarsorrhaphy	155
Tear Osmolarity Test.....	157
Temporal Artery Biopsy.....	159
Tensilon Test	161
Tonometry Using Goldmann Applanation Tonometer	163
Tonometry Using iCare® Noncontact Tonometer.....	165
Tonometry Using Pneumotonometer	167
Tonometry Using the Tono-Pen™	169
Trans-Lid Suture (Quickert Sutures).....	172
Triage of the Ophthalmic Patient	174
Ultrasonic Biomicroscopy (UBM).....	176
Ultrasonography: Standardized Echography (Combined B-scan and A-scan).....	178
Visual Acuity: Distance.....	180
Visual Acuity: Near.....	183
Visual Field Evaluation: Automated.....	184
Visual Field Evaluation: Confrontation.....	186
Visual Field Evaluation: Goldmann	187
Appendices	
A. Recommendations of American Academy of Ophthalmology Wrong-Site Task Force.....	190
B. Test Your Knowledge – Continuing Education Sample Post-Test.....	194
Bibliography	206
